Hand Made in the UK

SIZE GUIDE

Dog Collars

How to measure your dog

The Creature Clothes dog collars are **measured by neck size not by overall collar length**. So please measure your dog's neck, ideally with a fabric tape measure, as you would like the collar to fit. Or measure your dog's old collar from the buckle to the hole that your dog wears their collar on. Please also remember that you should be able to comfortably fit two fingers inside the collar when it is on.

Please remember that this is just a guide, a collar that fits one labradoodle may swamp their sibling. You also want to aim for the collar to fit at the midpoint of the measurements, not at one extreme or the other. You never want your collar to be on the very last hole.

Size	Neck size (cm)	Neck size (in)	Breed guide
Size 1	23cm - 30cm	9" - 10.5"	Yorkie, Daxie and mini breeds
Size 2	25cm - 35cm	11" - 13"	Jack Russell, small terriers, Pug, Beagle
Size 3	31cm - 42cm	12" - 15"	Scottie, Cocker Spaniel, Westie, Fox Terrier
Size 4	40cm - 51cm	15" - 18"	Springer Spaniel, Labradoodle, slender Dalmatian and Labrador, Boxer
Size 5	46cm - 56cm	18" - 21"	Golden Retriever, male Labrador, Alsatian, Rhodesian Ridgeback
Size 6	56cm - 66cm	22" - 26"	Great Dane, Bulldog

Dog Leads

We grew up in the 80's when metric took over from imperial, so we're a bit all over the shop when it comes to a measurement system... apologies!!!

Type of lead	Dimensions
Leather lead	1m long
Fabric lead	3ft or 4ft long

Dog Bandanas

Bandana size	Dimensions in cm	Breed guide
Small	16cm x 9.5cm	Best for little breeds (Yorkie, Patterdale, etc.) -up to our size 2 collar—and even cats
Large	25cm x 16cm	Will fit all other breeds from a Westie right up to a Great Dane

Dog Dozas & Cat Nappas

If you would like one of our dog dozas or cat nappas to fit inside an existing basket, remember that they have no hard or solid parts and are very squidgy, so they will squish into the basket. It is better to go for a slightly larger option than one that is too small.

Doza size	Dimensions in inches	Breed guide
Small	21" x 23"	Yorkies and cats
Medium	26" x 34"	Spaniels, terriers, curled up bigger breeds who sleep in a ball
Large	34" x 42"	Labradors, retrievers, Dalmatians and Greyhounds

Washing & Care

Leather Collar Care

If you treat your leather collars well they will thank you by growing more beautiful with age. To clean the leather, rinse the collar in warm water to get any major dirt off, then treat them with Neats Foot Oil for waterproofing or Saddle Soap. This will keep the leather moist and supple.

Different leathers are best for different purposes: black, tan and chocolate are great collars for rugged use. The coloured leathers will also age beautifully but the colour in the leather may

darken with a lot of swimming and wear - for example the red and green may darken with wear. The pink patent and white leathers are more for urban wear, for obvious reasons!

Please be careful with the patent collars when putting flea treatments or any other chemical solution on your dog as this may affect the patent finish. It is best to remove the collar and wait until the area is dry before re-dressing your dog.

Studs

Our metal studs are individually riveted by hand to ensure they are as strong as possible. If you should loose a stud, please let us know and we can repair your collar.

Fabric Collar Care

Our fabric collars and leads all have a webbing core for added strength. They can be machine washed in a regular washing machine, but we recommend covering the metal wear with a sock, or washing the collar/lead in a pillowcase to protect the machine. Our wool collars and leads can be machine washed on a cold wool cycle.

Fabric Lead Care

Our fabric collars and leads all have a webbing core for added strength. They can be machine washed in a regular washing machine, but we recommend covering the metal wear with a sock, or washing the collar/lead in a pillowcase to protect the machine.

Our wool collars and leads can be machine washed on a cold wool cycle.

Dog Doza Care

You can machine wash our dog beds - cool huh? All of our beds have a loose zipped cover, filled with 2 separate 15 tog duvets - we use separate specially made quilts so that they fit inside a regular washing machine - no need for expensive trips to the laundrette.

So the cover is washable, as are the 2 duvets inside, meaning you can wash the cover on its own or the duvets one at a time so your dog always has a bed, or pop the whole thing in the machine - totally flexible!
