

## LEUCHTIE LED LIGHT DOG COLLARS

### HOW TO MEASURE YOUR DOG

---

The Leuchtie is placed on the dog as a closed ring and it is only necessary to open it for initial activation and battery replacement.

So **the size of the head is the measurement you need** – not the neck measurement.

Resize an adjustable collar so that you can place it over the dog's head and pull it back off again without it being too tight and uncomfortable for the dog.

Now measure the **inside** of the adjusted collar with a flexible tape measure as precisely as possible.

Alternatively, use a piece of string or strip of paper – lay around the inside of the adjusted collar, make a note of the finishing point and measure this.

Then select the nearest size Leuchtie – keep in mind that there is only a very small amount of "give" in the Leuchtie.

### SIZE GUIDE

---

Leuchtie Mini	Leuchtie Plus	Premium Leuchtie
25cm	35cm	35cm
27.5cm	40cm	40cm
30cm	45cm	45cm
32.5cm	50cm	50cm
	55cm	55cm

## CHANGING BATTERIES

---

The batteries need to go into the battery pack as follows: first 'on the side with the size tag' - using two thumbs, gently roll-back the soft silicon tubing i.e. roll it *away from* the battery pack *towards* the coloured collar-tubing; then disconnect the tubing by 'working it' i.e. gently pulling and easing its internal plug *away from* the battery pack.

Place the Leuchtie in front of you on a table with the battery pack pointing towards you, and the size tag on the tubing on the right hand side.

NB: when re-assembling, the battery on this side must enter the battery pack with its '+ pole-end' leading (leaving the 'flat-end' of the battery showing). Then open the other side (with no size tag) by using the same technique.

NB: the battery on this side must be fitted with its '+ pole-end' still showing. Fit the batteries and re-insert the internal plugs on both sides.

Check that the Leuchtie is working (by holding the battery pack downwards).

When you're sure that the internal plugs on both sides are securely closed, unroll/restore the soft-tubing securely back into position.

## FREQUENTLY ASKED QUESTIONS

---

### **Which dogs is the Leuchtie suitable for?**

Leuchtie is great for any dog. It is perfect for dogs who like to play and run off the lead in the dark, in the garden, in fields or at the beach. You will always know where your dog is if he wears a Leuchtie LED Light Collar.

The Leuchtie is also great when your dog is on the lead, as he will be seen clearly by motorists – keeping him safe when walking in town or on country roads.

The Leuchtie high visibility collar is ideal for dogs with long coats thanks to its extra bright Superflux LEDs. In Germany, the collar is used on Search and Rescue dogs. The bright green and blue can be seen up to 1,000m away.

### **What is the right size Leuchtie for my dog?**

The Leuchtie High Visibility LED Collar is slipped over the dog's head as a closed ring. So to select the right size you need to measure the dog's head and not its neck. The best way to do this is by setting an ordinary collar to a size where you can just slip it over the dog's head. Then take it off and measure the inside of the collar. This gives you the size of the widest part of your dog's head. Choose a Leuchtie that is closest to that size, but not smaller.

### **But my dog isn't fully grown yet?**

If your dog has not much more to grow and you can estimate what the fully

grown size will be, you can purchase a Leuchtie which is one size larger, so he or she can grow into it. Each Leuchtie light collar comes with a little strap so you can attach it to a normal collar to secure it.

### **What are the advantages of the Leuchtie LED Collar compared to other high visibility products on the market?**

- Extra bright solid light, no irritating blinking.
- 4 (or 3 in the Mini Leuchtie) Superflux LEDs make your dog visible from all angles.
- Easy to use – just slip over the dog's head.
- Automatic on/off switching, without manual mechanism.
- Long lasting in any weather.
- 100% waterproof.
- Easy to clean – just wash with water.
- Low energy consumption.
- Complies with all EU safety regulations for electronic equipment.
- Uses ordinary AAA (or AAAA for the Mini Leuchtie) batteries.
- Available in 8 fashionable colours.

### **Can I get replacement parts for my Leuchtie?**

Yes you can. Just give PetsPyjamas a call on 0845 805 8458 and we will help you get the right replacement part for your Leuchtie.

### **What should I keep in mind when using the Leuchtie?**

The Leuchtie is very robust and copes well with most environmental influences. However, there are few things you could keep in mind:

- The Leuchtie is not a toy! Don't let your dog play with it and you should keep the Leuchtie stored in a safe place where your dog can't reach it. Chewing of the Leuchtie could cause damage to the electronic components of the product. Also if your dog swallows any of the small parts (springs, batteries, etc.) this could become a health issue and you should consult with your vet.
- The Leuchtie is easily cleaned with water and a mild detergent. Please do not use any abrasive or solvent based cleaning materials.
- Do not attach a lead to the Leuchtie or try to hold the dog by the Leuchtie. Too much force could pull the Leuchtie apart and springs or batteries might fall out and get lost.
- The Leuchtie is 100% waterproof and can be worn in any weather. It's even okay to swim with. However, please make sure no water gets inside the battery pack when changing the batteries. Clean and dry the Leuchtie thoroughly before changing the batteries. Make sure the Silicon tubing is sealing properly and if necessary replace it. (Contact us if you need new Silicon seals).

If, for any reason, you think your Leuchtie requires maintenance, please contact PetsPyjamas so that we can advise on the correct replacement part.
